

RING SIZER

The ring sizer should measure 7.35 cm in length once printed. If your measure is not printing to scale, please verify that printing options do NOT have "fit to page" selected.

Cut out contour of ring sizer and place it around your finger with the numbers facing out and note your approximate size. Use tape to secure the ring sizer and try to slide it over your finger. The ring sizer should fit snugly, but not too snugly. Please note that this is only an approximate size.
